The need for blood is constant – every two seconds someone in the U.S. needs blood. In fact, each day, the American Red Cross must collect approximately 14,000 units of blood to meet the needs of patients at around 2,600 hospitals and transfusion centers

Your stem cells has the ability to cure blood cancers and blood diseases. All it takes is a simple swab to join the registry. If you get matched to a patient, it is likely that you are their only cure. **Donors ages 18-44, in general good health, and committed** to donating to anyone in need please drop-in to learn more, do some paperwork & swab your cheek – no appointment necessary.

If you are unable to attend but would like to order a swab kit, go to join.bethematch.org/UCSF
