Wild Fires & Air Quality Concerns Towards Health

野火和空氣環境污染對健康的影響

Year 2017 had the worst seasonal wildfires in California - with over 8,750 fires that burnt through over 1 million acres, and killed over 40 people. The Tubbs fire in Napa and Sonoma Counties that lasted from October 8 to 31 alone was the single most destructive fire, killing 22 people, and burnt over 36,000 acres. Now that these wildfires have been controlled, we are asking questions about the polluting effects of these fires on the environment and landscape. Please join us in the following lecture as Professor Kent Pinkerton, Director from UC Davis' Center for Health and the Environment, shares his expert knowledge with us. This is a free and bilingual (English/Cantonese) lecture. All are welcome.

加州在 2017 年發生了最嚴重的季節性野火，超過一百萬英畝的 8,750 場火災，造成四十多人死亡。從 10 月 8 日到 31 日在納帕 Napa 和索諾瑪縣 Sonoma 縣的火災是一次最具破壞性的火災，造成 22 人死亡，並燒毀了 36,000 多英畝土地。雖然現在這些野火已經受控，但我們對這些火災污染了環境的影響仍有很多疑問。所以我們邀請了加州大學戴維斯分校健康與環境中心主任教授與我們分享他對野火造成環境污染的專業知識，這是一個免費的雙語（英語/廣東話）講座，歡迎參加。

Speaker
演講者 **Kent Pinkerton, PhD**
Professor of Pediatrics, School of Medicine
Professor of Anatomy, Physiology and Cell Biology, School of Veterinary Medicine
Director, Center for Health and the Environment
University of California, Davis

Date/Time
日期時間 **March 6, 2018 (Tuesday) 三月六號 (星期二)**
下午 5:00 - 6:30 pm

Location
地點 **Herbst Hall, UCSF Mount Zion Campus 赫布斯特館**
1600 Divisadero 街 (Between Post and Sutter St.), 2nd floor, San Francisco

RSVP
敬請回復 請致電 **Call 415-885-3678 留言**
