

Gynecologic Cancer

婦科腫瘤

Every six minutes, an American woman is diagnosed with gynecologic cancer, including cervical, endometrial, ovarian, peritoneal, tubal, vaginal and vulvar cancers.

Endometrial cancer of the uterus, sometimes referred to as uterine cancer, is the most common cancer of the reproductive system, while ovarian is the fifth most common cause of cancer deaths in women. This condition most frequently affects older women, with the incidence increasing significantly at the time of menopause.

At the UCSF Helen Diller Family Comprehensive Cancer Center, our team — including gynecologic cancer surgeons, radiation specialists and specially trained nurses — offers innovative, compassionate care in a supportive environment. Our services cover screening exams, diagnostic imaging, treatments such as surgery and radiation, advice on the latest therapies available, patient education and other specialized services. Genetic counseling for high-risk families also is provided.

Conditions

- Cervical Cancer
- Endometrial Cancer
- Fallopian Tube Cancer
- Ovarian Cancer

每六分鐘就有一名美國婦女被診斷出患有婦科癌症，包括子宮頸癌，子宮內膜癌，卵巢癌，腹腔，輸卵管，陰道和外陰腫瘤。

子宮內膜癌，或稱為子宮癌，是生殖系統中最常見的癌症，而卵巢癌是婦女死亡的第五最常見的原因。以年長婦女最受影響，絕經後的發病率更顯著增加。

在 UCSF 海倫·迪勒(Helen Diller)家庭綜合癌症中心，我們的團隊 — 包括婦科癌症外科醫生，放射專家和受過專門訓練的護士 — 提供創新的、富有同情心的照顧的支援環境。我們的服務涵蓋篩查檢查，影像診斷，治療，如最新的治療手術和放療，提供諮詢，患者教育等專業服務。亦提供針對高風險家庭的遺傳諮詢。

狀況

- 子宮頸癌
- 子宮內膜癌
- 輸卵管癌
- 卵巢癌
- 腹膜癌
