

Clinical Laboratory Tests: What Happens if You're not Responsible 臨床驗血測試：如果你不留心的可能後果

UCSF ASIAN HEALTH INSTITUTE BILINGUAL HEALTH LECTURES
亞裔健康研究院雙語健康講座（英語和廣東話）

SEVENTY PERCENT OF ALL MEDICAL DECISIONS are based on results of clinical laboratory tests. Most patients take these test results for granted, thinking that physicians know what is best for their patients. Medical practices today have electronic health record portals where patients can see their test results. There are other websites where patients can learn what these test results mean. Using this information, patients can participate in making medical decisions for themselves and their loved ones. That helps to reduce the incidence of medical mistakes, the third-leading cause of death in the United States today. Alan Wu, PhD, author of [*The Hidden Assassin: When Clinical Lab Tests Go Awry*](#), will recount real medical stories in this presentation to highlight the importance of clinical laboratory testing. This is a free bilingual (English/Cantonese) class. Don't miss this outstanding lecture. All are welcome.

在 所有醫療決定中有七成的決定是基於臨床驗血的報告。大多數患者都認為這些驗血結果是理所當然的，而醫生會知道什麼醫療決定對患者最好。現今的醫療已設網上病歷站，病人可以上網看到自己的驗血報告。他們還可以上其他網站去多了解這些測試。通過這些資料，患者可以參與對自己和親人的醫療決定，這樣可以減少發生錯誤的醫療決定－美國的第三大死因。Alan Wu

博士被誠邀為本講座演講，他是一本命名《[*隱藏的刺客：當臨床驗血結果出錯時*](#)》的書之作家。他會通過講述可怕的真實醫療事故以突出驗血結果的重要性。這是一個精彩的免費雙語（英語／廣東話）講座，不容錯過，歡迎參加。

Speaker

演講者

Alan Wu, Ph.D.

Professor, Laboratory Medicine, UCSF School of Medicine
Chief, Clinical Chemistry and Toxicology Laboratories, Zuckerberg San Francisco General Hospital & Trauma Center
