

you're invited! **MYLA'S RE-BIRTHDAY**

Myla was diagnosed with myeloid sarcoma, a form of acute myeloid leukemia. She needed to find a matching stem cell donor, who had to be the same ethnicity as her. Because there are not enough diverse donors on the registry, Myla received a haploidentical stem cell transplant from her father.

In honor of her 5th Year Transplant Anniversary, there will be a stem cell/marrow donor registration event at:

UCSF Mission Bay
The Shorenstein Family Café
August 15 from 11:30am - 1:30pm
